Title: SunTrust speeds report distribution to managers

Author(s): Curley, B.

Journal: Bank Systems + Technology vol.35, no.12 p.20

Publisher: Miller Freeman,

Publication Date: Dec. 1998 Country of Publication: USA

CODEN: BSYTEE ISSN: 1045-9472

SICI: 1045-9472(199812)35:12L:20:SSRD;1-W

Material Identity Number: N682-1998-011

Language: English Document Type: Journal Paper (JP)

Treatment: Practical (P)

Abstract: SunTrust Bank is leveraging a fax service to get critical reports into the hands of branch managers, private bankers and personal account executives quickly, while lightening the load for support staff. Harte-Hanks Data Technologies, which provides customized marketing **databases** and its P/CIS and Desktop Direct software to SunTrust, has partnered with FaxBack Inc., to provide a secure, 24-hour fax-on-demand system to SunTrust managers. Using a touch-tone telephone and a security code, bank managers in Florida, Georgia, Tennessee and Alabama can order from a menu of **database** marketing reports using FaxBack's voice menu. Once ordered, the report requests are transferred from the FaxBack **server** to the bank's Harte-Hanks P/CIS **database** via a custom interface. The reports then are automatically generated and transferred back to the FaxBack **server**, which faxes them to the caller. Jennifer Wilson, marketing officer for the Atlanta-based, \$58 billion bank, said managers and representatives who work with high-end **clients** can order reports on maturing accounts and "next product to buy" marketing models generated by P/CIS. The latter, based on **customer** demographics and buying patterns, list **customers** most likely to purchase specific products, such **equity lines** of **credit** or credit cards. (0 Refs)

Treatment: Practical (P)

Abstract: In January, Speaker of the House Newt Gingrich unveiled "Thomas," the new Internet access point to congressional information (<http://thomas.loc.gov>). The plan is for Thomas to give citizens access to the full text of legislative bills and to the congressional **record**, among other things. There are nits to pick, of course: While Thomas shows how easily **people** can electronically access legislative information, the Web page also exemplifies the enormous gulf that separates the government as provider, from citizens as **consumers**, of information. Few **people** have the motivation, time, or expertise to read full-text bills or the congressional **record**. (Congressional information output quickly fills thousands of pages per day with results of House and Senate deliberations; countless hearings; legislative and investigative committee reports; and agency studies and reports.) The essential question is, to what extent should-and can-government try to bridge the gap between its ability to provide information and **people**'s ability to consume it? Even for those individuals who stand four-square in favour of openness and access, the answer is neither easy nor obvious. (0 Refs)

Abstract: Use of a 'location authority' and a separate 'billing authority' for personal identification numbers (PIDs) is proposed to exploit the existing telephone infrastructure. A mobile PID has no inherent location or routing information. A 'location authority' is responsible for tracking the PID's current location and detecting duplicate PID usage. A 'billing authority' operates like a credit card company, offering on-line **credit** and service profile verification. A PID could have several 'billing authorities' responsible for maintaining the **users** service profile and guaranteeing payment to service providers. The author examines transactions, **database** requirements, and billing for log-in and call

set-up under the proposed concept. (6 Refs)

Title: Bringing images into the credit line . 3M-sponsored bankers' forum calls for new software

Author(s): Marquardt, L.R.

Author Affiliation: 3M Document Syst. Div., St. Paul, MN, USA

Journal: Inform vol.3, no.2 p.19-20

Publication Date: Feb. 1989 Country of Publication: USA

CODEN: INFREN ISSN: 0745-9963

Language: English Document Type: Journal Paper (JP)

Treatment: General, Review (G)

Abstract: When bankers from twenty-nine major banks met in a forum sponsored recently by 3M Company to discuss document and data management systems, some interesting observations came to light. Most bankers admitted that their **people** seldom like the automated systems they use. The systems are not '**user** -friendly'. In addition, workers frequently must use several different systems to perform special functions. The unfortunate fact is that, even with automated banking systems, the end result always seems to be more paper. The solution that appears to be materializing out of the blizzard of paper is the integration of image management into data management. (0 Refs)

Treatment: General, Review (G); Practical (P)

Abstract: Standard commercial loan department functions can be enhanced with tickler systems to monitor expiry of financing statements and insurance policies, and also with documentation exceptions tracking

systems. Loan officer productivity can be improved by automated generation of reminder letter and automated document preparation. Additionally, advance formulas can be **monitored** for lines of **credit**, construction loans can be **monitored**, cross-selling opportunities identified and loan officer activity reports produced. (0 Refs)

Abstract: A high-performance, field-ready optical disk system has been designed for remote data collection applications. The system, contained in a single-console unit, includes all disk drive optics and mechanisms, data processing electronics, and onboard microcontroller unit. Data is transferred at 20 Mb/s continuously or at 40 Mb/s in bursts; the **user** data capacity is 5×10^9 bits per disk side with no more than 1 in 10^9 bits in error. Data is recorded in two parallel channels using a dual-element CDH- **LOC** diode laser array. Two-channel operation affords closer track juxtapositioning than is possible with single element devices, thus increasing data capacity by as much as 50%. A single HeNe laser beam is split into multiple beams by cascaded transmission phase gratings for dual-track readout and radial tracking control. Development of a dual beam recording system for severe environment operation addressed the problem of system field-of-view. Analysis of the proposed optical design was undertaken to budget alignment, beam-pointing drift and mechanical tolerances. (5 Refs)

Treatment: Applications (A)

Abstract: The study was initiated to increase the accuracy of aircraft guidance along ILS beams and to ensure continuation of automatic landing in the event of a localizer transmitter failure. New developments ensure the detection of deviations of the Loc beam centerline after an undetected failure of the **monitoring** of the **Loc** axis alignment with the runway axis, in order to achieve Category III decision heights on Category II ILS beams. Aircraft, auto-pilot, inertial navigation system error and Loc beam perturbation modeling were studied. After AIRBUS A300 flight tests, the simulation results were compared with the flight test results. (5 Refs)

The credit line -- How eCredit is enabling all those B2B exchanges

Sperling, Nicole

Red Herring , June 1, 2000 , n79 p308, 1 Page(s)

ISSN: 1080-076X

Company Name: eCredit

URL: <http://www.ecredit.com>

Languages: English

Document Type: Articles, News & Columns

Geographic Location: United States

Spotlights eCredit of Dedham, MA (781), an online financing company for the online business-to-business market. Says eCredit provides a means for arranging financing quickly, allowing **customers** to complete a high-value sale in a matter of minutes. Claims the model will become an integral part of business-to-business as the marketplace expands. Notes the company uses a complex **database** for credit approvals, which connect with major credit bureaus for verification. Points out the company is selling both its software and its services, enabling them to assist companies who have a strong relationship with a specific financial institution. Notes the eCredit model significantly lowers the cost of order processing transactions. Calls it a strong company with little competition. Includes one photo and one sidebar. (kgh)

Document Type: Articles, News & Columns

Hardware/Software Compatibility: IBM PC Compatible

Geographic Location: United States

Focuses on Novell Inc.'s updated network operating system, NetWare 5.0, claiming that it has an easier-to-use interface, enterprise-class **database** support, and native support for IP. Reports that NetWare 5.0 has solid support for legacy systems and integrates well with Windows NT running IP, calling this program a must-have upgrade for dedicated NT shops. However, states th recent survey indicated that, for the first time, the install of NT 4.0 exceeded NetWare's base. Explains that tests revealed t Novell Directory Services and **user** management capabilities remain ahead of those in NT, though Microsoft is quickly gaining ground. Attention is given to NetWare 5.0's ZENworks directory-integrated, policy-based desktop management utility which is capable of **loc** down and storing the desktop environments of **users** , and can also manage legacy Windows 95/98 and NT 4.0 workstations. Includes one table.

Consumers face high prices for basic foodstuffs and indus raw materials despite mounting surpluses of key commodities. Situation attributed to record harvests world-wide, recession that has reduced usage of basic raw materials and lingering inflation. Also attributed to disarray in world's money markets. Countries have to export raw materials regardless of market prices in order to service debts and keep credit lines open, thus supply and demand are no longer prime factors in commodity trade (M).)

Government to loosen reins on business

SOUTH KOREA: GOVERNMENT TO SCRAP REGULATIONS

The Korea Herald (XBF) 29 Mar 1999 p.1

Language: ENGLISH

South Korea government will abolish all regulations that hinder economic activities and overhaul around 10 laws in 1999, including those on banking, insurance, liquor and national property taxes. Ministry of Finance and Economy will revise 97 laws in its charge over the next few years. The government will expand the corporate credit line system so as to move

financial institutions away from loans with collateral to credit loans. The ministry will specify regulations for a tight credit monitoring system to encourage lending just to corporate and retail **borrowers** with high credit standings. Those financial institutions with a good **record** of credit lending will get tax benefits.

Visa reaps **record** reward for quarter
AUSTRALIA: VISA REPORTED 39.4% HIKE IN SALES
The Australian (XAA) 29 Sep 1998 P.23
Language: ENGLISH

Credit card giant Visa International reported that sales volumes in Australia for the June quarter 1998 increased by 39.4% to AU\$ 8.77 bn as compared to the same period in 1997. Sales volume hiked by 40% to AU\$ 32.4 bn for the year to 30 June. Visa attributed the good performance to tied rewards such as frequent-flyer points to credit card spending. Meanwhile, its Qantas Telstra Visa card is the most popular rewards-based card circulating in Australia with more than a mn cardholders in early 1998. The credit card giant was also pleased to reveal that debts owing by **consumers** increasing at a slower pace as compared to the use of credit cards. This was an reflection that Australians are treating the card as an utility rather than as **lines** of **credit**.

CBA card designed for small business
AUSTRALIA: CARD FOR SMALL BUSINESSES BY CBA
The Australian (XAA) 26 Aug 1997 P.21
Language: ENGLISH

Australia's leading bank, Commonwealth bank (CBA), has launched a credit card that integrates purchasing and expense monitoring functions with a credit facility. Other than enabling small businesses to charge the purchasing of stock and equipment, the card could be used for settling payments for travel and entertainment purposes as well as keeping **record**. It could be used by more than one employee as separate recording is possible for each **user**. It is also equipped with a merchant category block that enables business to prevent employees or the department to use the card for certain undesirable purposes such as in restaurants or hotels.

For instance, the card could restrict the purchases of stationery to a maximum of AU\$ 150 per transaction. Hence, the card facilitates effective financial management by monitoring and controlling expenses. In addition, the card offers free liability insurance of up to AU\$ 50,000 and conditional travel insurance of up to AU\$ 200,000. It could be used as a charge card as well at an **interest rate** of 16.45%. It could also be used as a revolving **line of credit** at unsecured **interest rate** of 12% and secured **interest rate** of 11.5%.

Direct Line may launch credit card
UK: DIRECT LINE CONSIDERS CREDIT CARD
Financial Times (FT) 16 May 1994 p.7
Language: ENGLISH

The UK telephone insurance company which is owned by the Royal Bank of Scotland, Direct Line, is considering increasing financial service product sales with the launch of a credit card. This move may increase credit card issuing competition, as Direct Line has its own database to find low-risk customers. However, this idea is still a long way off as the company has yet to launch a mortgages scheme in summer 1994 and a number of life assurance products in 1995. Direct Line's chief executive, Peter Wood, may also link with the Royal Bank of Scotland to launch a motor insurance service for young drivers and owners of fast cars.

A RICH HAUL FROM THE SOUND OF MUSIC
WORLD - A RICH HAUL FROM THE SOUND OF MUSIC
Financial Times (C) 1991 (FT) 4 May 1991 p9

World: this article looks in detail at the lucrative and damaging trade of illicit copying and sale of recorded music. The International Federation of the Phonographic Industry estimates that pirates rack up worldwide sales of more than USD1r1bn (GBP578m) a year, compared with the USD1r21.6bn earned annually by legitimate **record** companies. Few countries are untouched by **record** piracy. In Nigeria the IFPI estimates that 11.8 million pirate recordings worth USD1r18m were sold in 1989. In Kenya, the 2.4 million illicit recordings sold accounted for 68 per cent of the market. While Third World countries are the main focus for the pirates, the European Community and the US are not immune. In Italy, Portugal and Greece at least 20 per cent of recordings sold in 1989 were pirate copies, the federation says. The federation achieved some successes during the 1980s, with government and **loc** al police co-operation greatly reducing piracy in countries such as Indonesia and Singapore. Now the music industry faces two new problems: growing piracy in the newly- liberalised markets of eastern Europe and the high quality of illegal recordings available on compact disc. Sir John Morgan, president of the IFPI, says there are three steps to stamping out piracy: the adoption of a copyright law protecting the rights of the legitimate industry; getting local law enforcement authorities to take action against the pirates; and securing convictions in the courts and the imposition of substantial penalties. USE OF VSATs BY THREE COMPANIES

US - USE OF VSATs BY THREE COMPANIES

Datamation (DTN) 15 August 1990 p71-73

ISSN: 0011-6963

Many companies in the US are beginning to use very small aperture (VSAT) satellites rather than terrestrial data communication to improve their operations and service to **customers**. An article by Scott Wallace, a

technology analyst and technical **journalist** describes the use of VSAT terminal satellite networks by K mart (Troy, MI), a retailer, Toyota Motor Sales USA's new Lexus division in Torrance, CA, and Edward D Jones (US), a brokerage house. As well as allowing **users** to own and manage their networks, VSAT networks can provide them with lower costs and greater reliability. For K mart, the use of a VSAT network to provide on- **line credit** authorisation has allowed it to improve its **customer** service by reducing the time needed for credit card verification, and also enabled it to obtain a lower discount rate from credit card companies. K mart's VSAT network comprises a USDlr3 mil central hub in Troy, MI, and satellite receivers at nearly 2,200 US stores. The Lexus division of Toyota cars is using its VSAT network to provide its dealers with real-time, on-line access to vehicle owner information and service **records**. The Toyota VSAT network could increase to support 1,500 sites in the next five years, up from the present 150. Meanwhile, Edward D Jones is using its VSAT network to support its service strategy by allowing **customers** ' questions to be answered promptly. Cost was an important factor for all three companies when deciding to use the VSAT networks which are fully described in the article.

TIME AND WARNER TO MERGE
US - TIME AND WARNER TO MERGE
Wall Street Journal Europe (WSJ) 6 March 1989 p1

Time Inc and Warner Communications announced on 4 March 1989 that they are to merge. Time has set up a USD1r5 bil **credit line**, and according to investment advisers, it is prepared to acquire the whole of Warner if necessary. Another factor affecting the transaction is the stance of Warner's largest shareholder, Chris-Craft Industries, whose chairman, Mr Herbert Siegel, has previously clashed with the head of Warner, Mr Steven J Ross. The deal foresees that Time will acquire Warner by means of a tax-free stock exchange, with Warner shareholders receiving 0.465 Time shares for each Warner share. The resultant company is expected to have a turnover of over USD1r10 bil/y.

Yahoo!, PayMaxx, Pitney Bowes, E-Stamp, ProNetLink, InfoCure, and other vendors offer small businesses a variety of time- and money- saving online services, for everything from marketing and **customer** lead generation to direct mailings, postage, payroll, and even electronic billing and credit card processing. Yahoo! and FreeMerchant.com offer businesses store builder services: helping them create an Internet presence, hosting their Web sites, and maintaining catalogs. Online auctions Yahoo!, Amazon.com, and eBay provide marketing outlets for cost-conscious retailers, improving visibility and sales despite small advertising budgets. Target Prospects offers **customer** lists from more than 95 million U.S. **consumers**. ProNetLink and Trade Compass offer leads, referrals, and information services. Digilead World Trading Network offers world trading data for businesses interested in the international front. E-Stamp, sanctioned by the U.S. Postal Service (USPS), allows **users** to download postage to a plug-in device and generate pre-printed postage-paid mailing. PitneyWorks offers similar postage services in addition to direct-mail services, **lines of credit** and business Visa cards. PayMaxx and Automatic Data Processing offer complete payroll-processing services online, significantly reducing small businesses' staffing costs. Not only do these vendors cut checks, maintain payroll **records**, make tax filings, and prepare year-end W-2 statements, they offer direct deposit services and custom electronic time, attendance, 401(k), and general **ledger** interfaces.
